Skill Week-1 **Kamtam Priyanka, 2520090001**

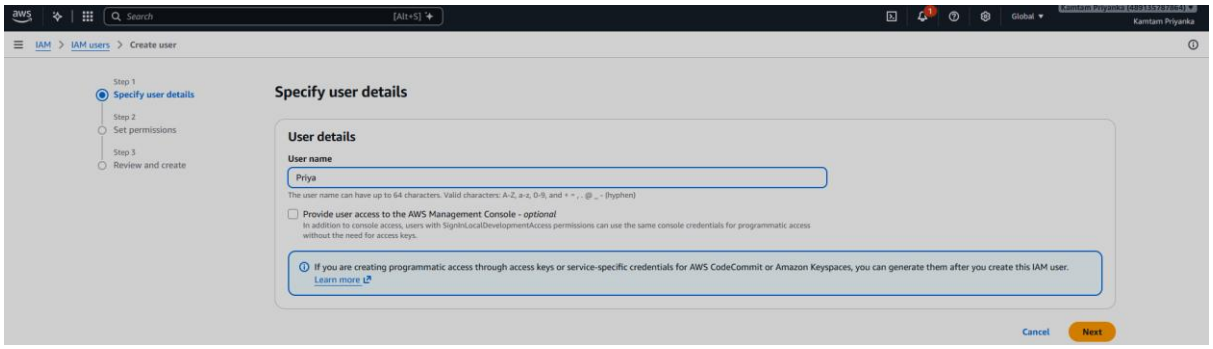

Task – 1 Creation of IAM User

Step-by-step procedure:

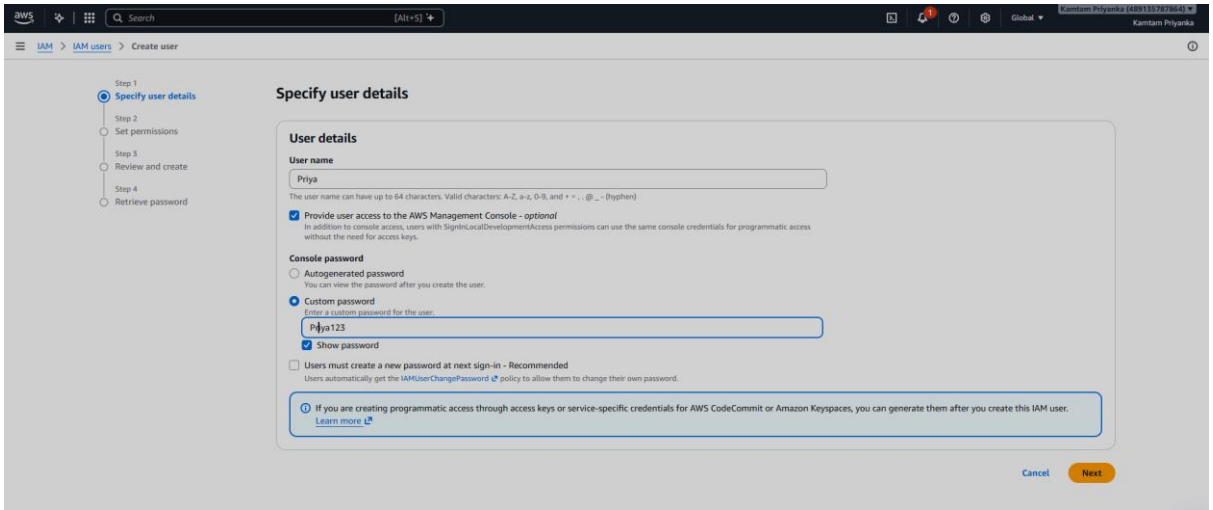

1. Search for IAM – The dashboard of IAM looks as below

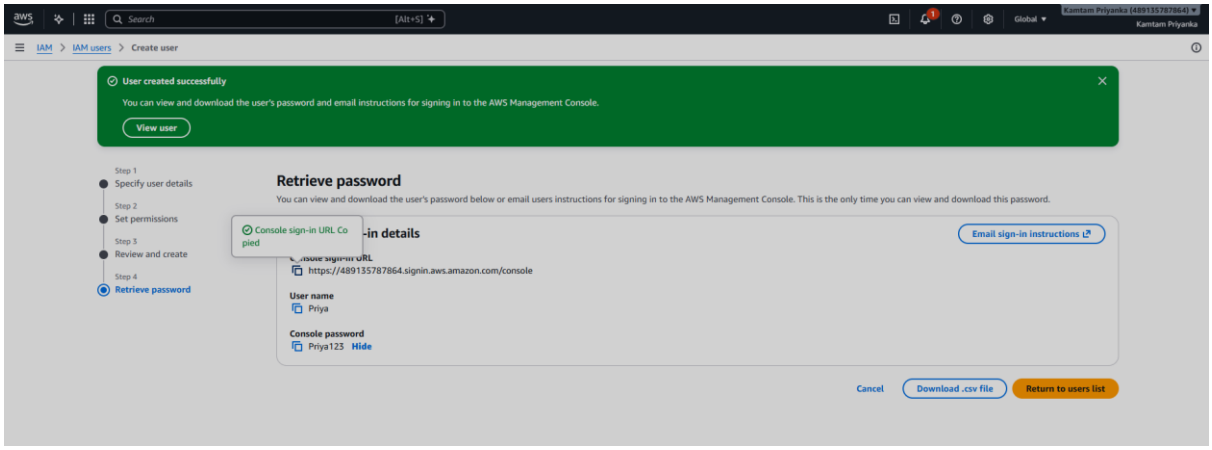

2. Click on Create user.
   Step-1 Specify user details
   Username chosen - Priya

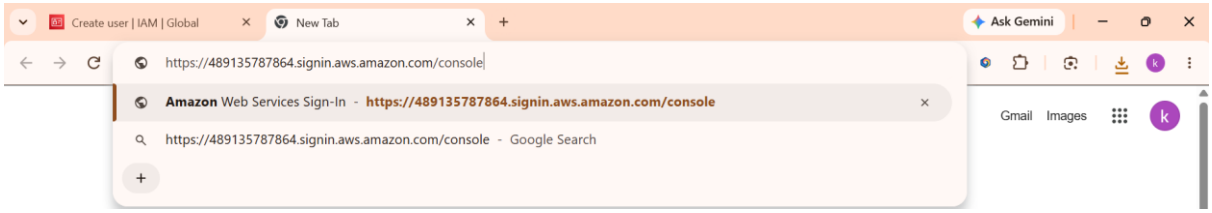

3. Select the option as custom password in order to have the same password for every login.

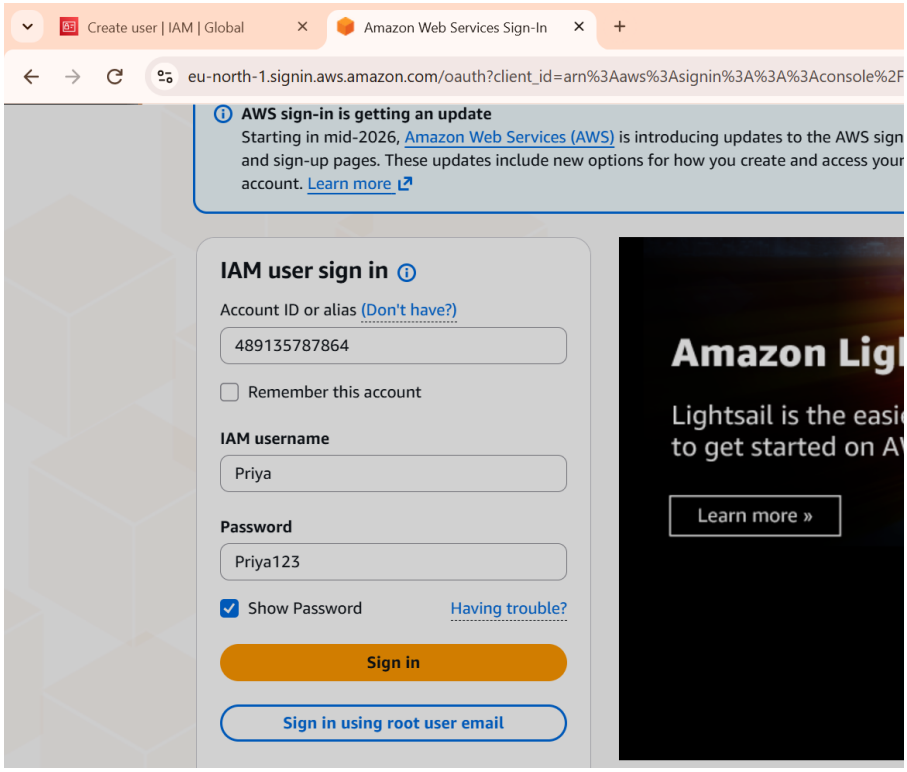

4. Under Step-2 keep the default options the same, in Step-3 check for the data and permissions. In Step-4 copy the console sign-in URL in order to login the new user created from the root console.

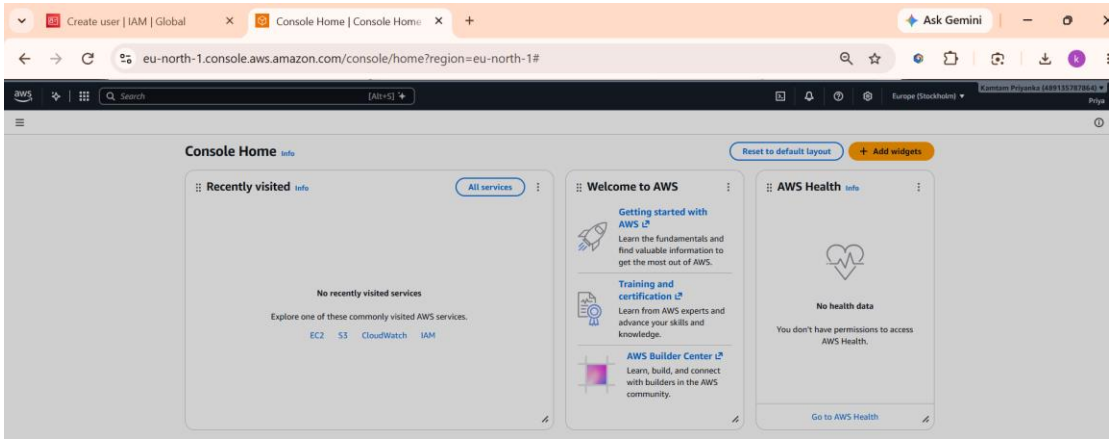

5. Now open new tab and search for the copied URL

6. Now login with the same credentials that are given in the root console for this new user creation.

7. You can see Priya under my account credentials at right corner – New user is created

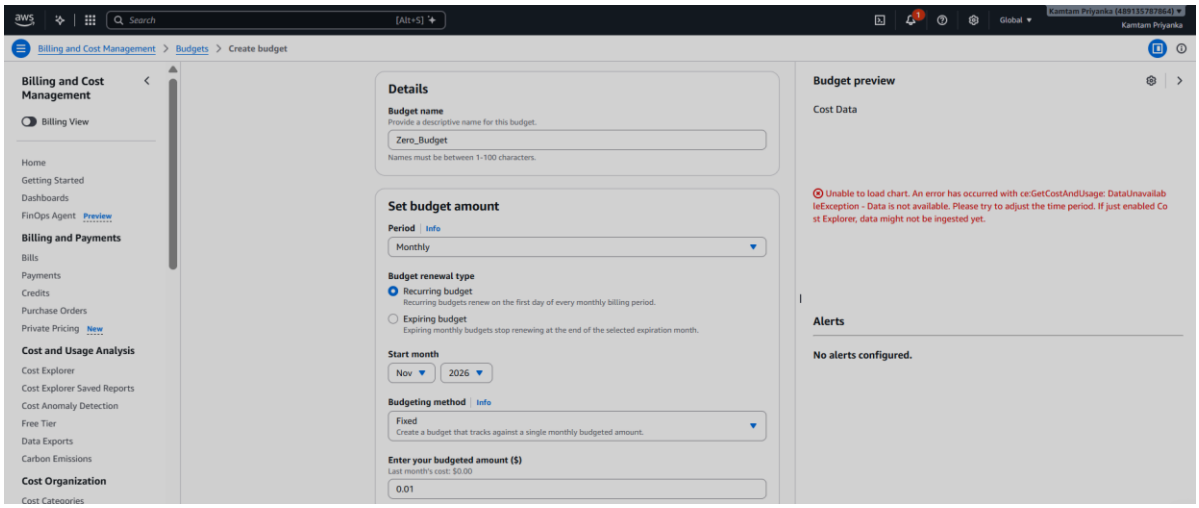

Task – 2 AWS Spend Tracking

Step-by-step procedure:

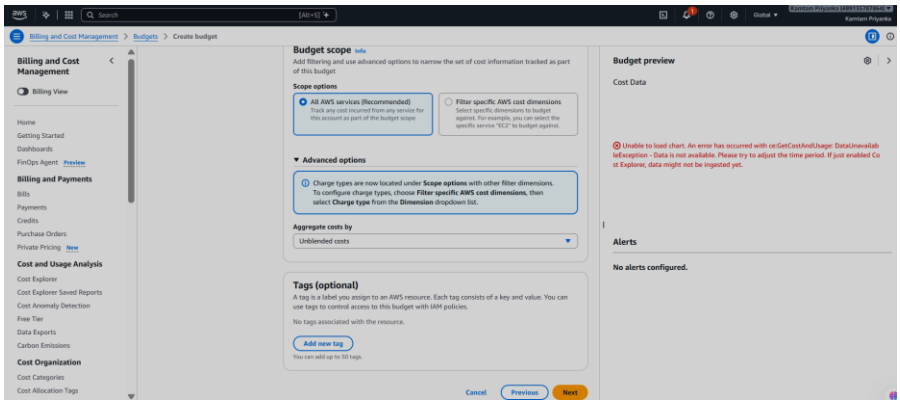

1. Search for Billing and Cost Management – This is how the dashboard of it looks

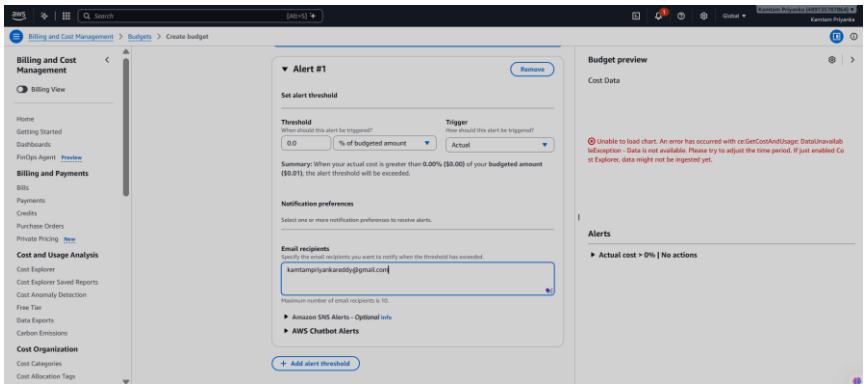

2. Click on Create a budget, then enter budget details, here I gave my budget name as Zero_Budget keep remaining default options as it is and budgeted month take as 0.01

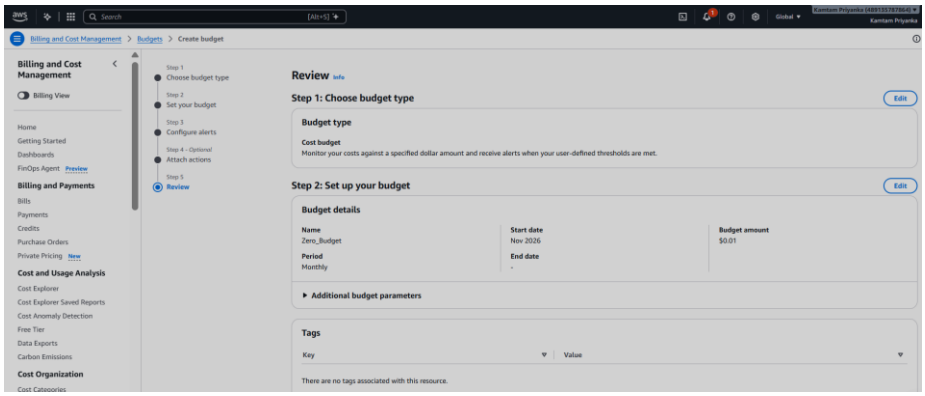

3. Keep the same default options as below and click on Next.

4. Under alerts section create one alert, give threshold as 0.0 and email recipient as the email for which you want to get alerts as budget spend limit is crossed or used so and so amount of budget.

5. Keep the Step-4 as it is and carefully look all the options chosen by you before creating budget.

6. It shows that the budget is created.
